

Instruction on the Use of QR Codes

I: QR Code Placement

The QR codes printed on the certificates of origin are placed differently for each form type, as illustrated below. In addition, the 32-digit QR code is printed below its barcode (and is placed in front of the barcode in the six-sheet certificate of origin).

1. Exporter (business name, address and country)		2. Importer/Consignee (business name, address and country)		3. Means of transport and route (as far as known)		4. For official use	
5. Date and number of packages		7. Number and kind of packages, description of goods		9. Origin criterion (see notes on page 1)	11. Gross weight or other quantity	10. Number and date of invoice	
11. Certification		12. Declaration by the exporter		13. Declaration by the applicant		14. For official use

III: Advantages of Using QR codes instead of Hologram Labels

- Saving the costs associated with printing and sending holograms to various branches of ICCIMA;
- Printing the security code (QR code) on all the pages of the certificate of origin, without any restrictions for certifications with more than a single page.
- Displaying the verification page for the issued certificate of origin after scanning the QR code on mobile devices without opening any webpage.

- D. Precluding any possibility of hologram counterfeiting as reported by some border branches.
- E. Enhanced access management for each chamber.
